

Conference Room  
Shown: contoura RippleWave™

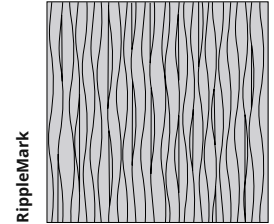

**description**

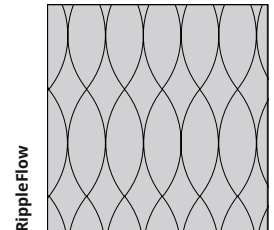

contoura™ custom carved acoustical ceiling tiles feature a three-dimensional design which extends beyond the grid to create a visually spacious interior. contoura™ scored mineral fiber ceiling tiles create the appearance of wave treads in the sand, ripples of water passing by, or parallel curves; while offering excellent acoustical value. contoura™ the mineral fiber decorative ceiling tiles are also available in a wide variety of colors to create a designer ceiling system that meets your specific design requirements.
